

KTK+ GmbH & Co. KG

## KTK+ Profi-Cutter / Band knife – cutting machine

Band knife cutting machine **KTK+ Profi-Cutter** for processing of foam and all kinds of textile.

Due to its price performance ratio and universal applicability this band knife is particularly suitable for:

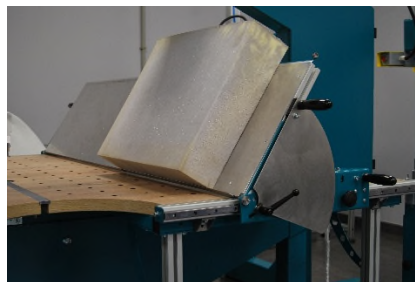

- Prototyping, prototype production,
- Interior plant,
- Upholstery,
- Craft + industrial
- Foam and fabric cut

To facilitate the processing of materials, the table top is equipped with air nozzles that distribute the air surface above countertop.

The advantages:

- easy and safe guidance of cutting materials
- increased cutting accuracy
- Improve health and safety
- fatigue-free working
- simple supply and removal of layers of textiles

The adjustable side fence allows a fast and accurate material cutting.

### Technical Data:

Cutting height with precision knife guide: 50 cm

Touchscreen panel with

- language Selection
- error Messages
- functions
- blade speed

Infinitely adjustable blade speed via touch screen 5-18m/s

Table top dimensions:  
right side of the knife 104 cm  
left side of the knife 104 cm  
length 180 cm

Table height adjustable: 80 – 88 cm

Space needed: 268 x 180 cm

cutting area - lighting equipment

Precision blade guide with adjustable side and back rolls

Sharpener with precision guide and sanding dust collection tray

knife catch device at knife breakage
